

Parts / Equipment Guide:

Crosby Forged Wire Rope Clip (Cable/Post Clamp)

Crosby Part # 1010195

NOTE:

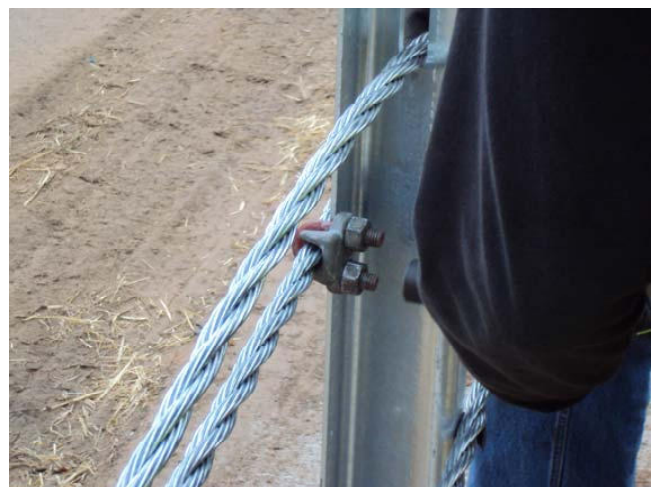

The "Ears" on one side of the clamp must be removed to provide "shoulder" for the post to grip. A grinder or saw can be used. There are other brands available. **Inexpensive clamps don't have a big enough base to work properly.**

When ordering other brands, specify a "forged crosby style" clamp.

G-450

Remove the lugs on one side as shown

Install on the flat side of the post.

Tighten with an impact wrench or ratchet/socket
